

## Instructions for Authors

### Open access and open minded

The *Beilstein Magazine* offers a platform for essays and interviews with interdisciplinary content, stimulating ideas and fruitful discussions.

The *Beilstein Magazine* is published and financed by the Beilstein-Institut. The online version is freely available at [www.beilstein-magazine.org](http://www.beilstein-magazine.org). About one to two times a year, selected articles of the magazine are published in print and distributed together with printed volumes of the Beilstein journals.

Due to the processing of the manuscripts for the different modes of publication (html- and pdf-file format), we would appreciate it if the manuscripts would fulfil following requirements:

### Manuscript Preparation

#### File Format, Language and Length

The manuscript should be prepared as an unformatted text file, saved in a readable document format such as rich text format (rtf), DOS-text format, Microsoft Word (doc, docx) format, Open Office or Libre Office format or html. Please do not deliver files that contain hidden instructions such as to create footnotes or reference lists.

The language is English; spelling should be US English. The manuscripts for the *Beilstein Magazine* should consist of 5000 to 10000 characters (including blanks).

#### Authors' Names and Affiliations

For all authors who have made substantial contributions to the work, first name, middle initial(s) and last (family) name and their affiliation must be provided.

#### Author's Photo

Please provide – as a separate file – an adequate portrait sized photograph (high-resolution suitable for print, min. 300 dpi) of each author including a job title and a short description of the current position of the author.

#### Keywords

Please provide a maximum of 5 keywords, avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Abbreviations should not be considered for keywords unless they are firmly established in the field. These keywords will be used for indexing purposes.

#### Graphics and Tables

Graphics should be separately saved in high-resolution tiff- or jpeg-format; file sizes should not exceed 5 MB. Images should not exceed 500 pixels per inch in width or height.

Do not embed the graphics within the text nor link them by OLE, but please insert corresponding placeholders within the text.

Tables should be separately delivered as text file.

Please include a separate text file containing the legends of the graphics; do not save figure numbers, legends or author names as part of the image.

It is the responsibility of the author to obtain permission to reproduce copyrighted material in his/her article.

## References

References are possible but not required. Please consider that a **maximum of 10 references** should be given. All references must be numbered consecutively with Arabic numerals, in the order in which they are first cited in the text, followed by any references in tables or legends.

The references should not contain any form of note or comment. Web links and URLs should be included in the reference list. They should be provided in full, including both the title of the site and the URL.

Examples of the Beilstein Magazine reference style are shown below. Please take care to follow the reference style precisely.

### Beilstein Magazine Reference Style

#### Article within a journal

Jacobsen, M. F.; Moses, J. E.; Adlington, R. M.; Baldwin, J. E. *Org. Lett.* 2005, 7, 2473–2476.

#### Article within a journal with non-continuous (i.e. issue-based) pagination

Gröger, H.; Sans, J.; Güthner, T. *Chim. Oggi* 2000, 18(3/4), 12-16.

#### Article within a journal with article number

Flamme, E. M.; Roush, W. R. *Beilstein J. Org. Chem.* 2005, 1, No. 7.

#### Article within conference proceedings

Jones, X. Zeolites and synthetic mechanisms. In *Proceedings of the First National Conference on Porous Sieves*, Baltimore, MD, June 27–30, 1996; Smith, Y., Ed.; Butterworth-Heinemann: Stoneham, MA, 1996; pp 16–27.

#### Complete book without editors

Gutsche, C. D. *Calixarenes*; Royal Society of Chemistry: Cambridge, U.K., 1989.

#### Book chapter or article within a book

Yus, M. Arene-catalyzed lithiation. In *The Chemistry of Organolithium Compounds*; Rappoport, Z.; Marek, I., Eds.; Wiley and Sons: Chichester, U.K., 2004; pp 647–748.
